Feedback from graduates:

“This training provides the right tools and techniques for anyone to make positive changes and guide their lives in a new and better direction.”
Barb, CNA

“This seminar was very beneficial to me. I learned more about being a leader and that I can be a leader. This class helped me with that, Thanks.”
Jenn, CNA

“This workshop allowed me to look inside my actions and behaviors to the reasons I was not achieving my goals and what it was that was causing me to struggle. It made me look at myself.”
Lona CNA

“This seminar allows nursing assistants to feel valued and understand how important our work really is.” Barb, CNA

Before Training:

“I get really mad at my supervisors sometimes cause they are always telling me to go to college, you should go to college. And I feel stupid cause I think they are putting me down, like I’m not smart enough to go to college. So I act like I don’t hear them.” Chris, CNA

During Training: (The goal Chris made for herself upon leaving the seminar):

“I apply for enrollment in college in 30 days, or less.”

After Training:

“I never thought I was smart enough to go to school, and I really thought my supervisors were just being mean when they would tell me I should go. Now I know that not being smart, is what I believed about myself, not what they believed, and I couldn’t see that until I took responsibility for how I felt about myself. I know I am smart enough and I can do it.” Chris, CNA
